

The 3rd International WANA Congress

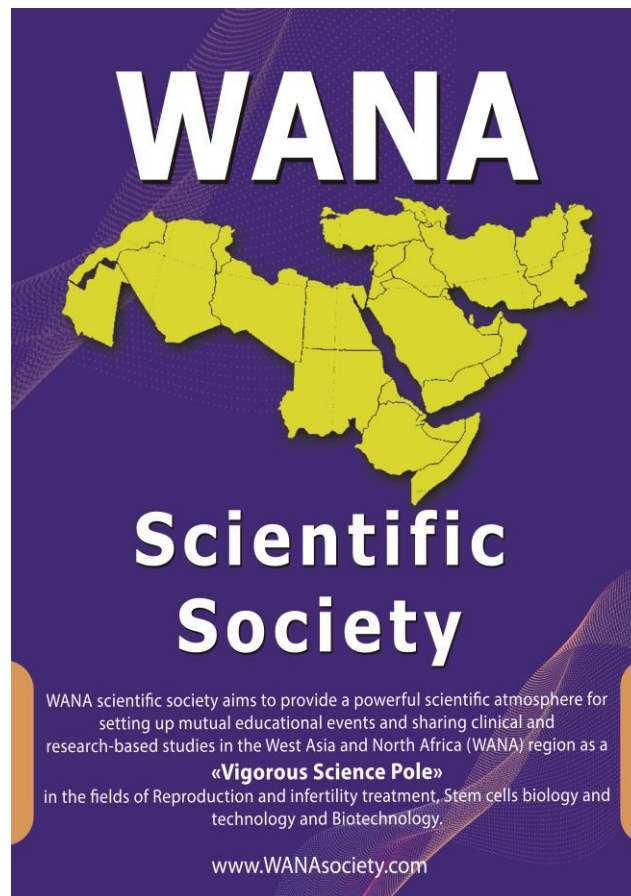

Urmia, Iran

16 – 17 May, 2024

Royan Jihad Academic Research Institute, in line with its international activities, has aimed to increase its relationship with Islamic and neighboring countries, especially the West Asia and North Africa (WANA) region, so that in addition to interacting with the scientific community, it can play a more effective role in the scientific development and growth of students, researchers and experts of this region. Another goal of forming this scientific network is to introduce the scientific potential of Iran and other countries in the WANA region to attract international scholars and create motivation and desire in them to travel to these countries and transfer scientific experiences to them through Establishing an effective relationship with the scientific centers of these countries. It is hoped that this will make researchers and scientists in this field more familiar with the scientific achievements of our country.

Following the scientific policies of the country, through creating a scientific network of WANA with a global approach, the Royan Institute can establish and consolidate its scientific position, especially in the fields of reproductive medicine, biotechnology and stem cells, and regenerative medicine. By creating convergence and synergy in joint educational, research, and clinical programs in the countries of the WANA region, this network intends to strengthen the science of the countries of this strategic region, which has a rich cultural, historical, and scientific background. By creating effective scientific communication and designing and planning joint scientific programs between the prominent scientific centers of

WANA countries, this association can try to make this region known as a "scientific pole" in accordance with the historical and religious dignity of this strategic region of the world., a region where all the countries are Islamic and in recent decades have not progressed according to their potential and knowledge due to domestic and international challenges.

The third international WANA congress was held on the 27th to 28th of May 2024 in cooperation with the Royan Jihad Academic Research Institute and the University of Medical Sciences and Health Services of West Azarbaijan Province (Urmia) Urmia City Unity Hall. The theme of this year's WANA congress was

Assisted Reproductive Techniques Outcome (ART Outcome) with the approach of dealing with the latest scientific achievements in the field of infertility treatment at the global level focusing specifically on the countries of the WANA region. This year's WANA congress was organized under the scientific secretaryship of Dr. Ahmed Vosoogh Taghi Dizj (Radiology specialist and vice president of clinical and specialized services at Royan Institute) and executive secretaries of Dr. Hojat Qasimnejad (Ph.D in Reproductive biology and head of the Reproductive Health Research Center of Urmia University of Medical Sciences) and Dr. Elham Amirchaghmaghi (Immunology Specialist and Head of Reproductive Medicine Research Institute of Royan Institute) and was very well represented by students, researchers, clinical specialists and basic sciences, and faculty members.

پیامدهای روش‌های کمک باروری: با اعتبار باز آموزشی

Assisted Reproductive Technology Outcome

- پیامدهای زودهنگام و دیر هنگام روش‌های کمک باروری
- حفظ باروری و باروری در بیماران مبتلا به سرطان
- ارتقاء پیامدهای روش‌های کمک باروری: چالش‌ها، مدیریت و انتخاب‌ها
- کارگاه‌های جنب کنگره:
 - کشف سلول
 - رشد، بلوغ و لقاح آزمایشگاهی تخمک
 - جراحی در آندومتریوزهای پیشرفته
 - هیستروسکوپی
 - بررسی سلامت آندومتر در زنان نابارور
 - روش تعیین پدجره لانه گزینی در سیکل‌های انتقال جنین منجمد
 - سینار دستاوردهای طب سنتی و مکمل در سلامت باروری
- Early & Late ART Outcome
- Fertility Preservation & Oncofertility
- Optimizing ART Outcome: Challenges, Managements and Options

ACECR PHARMED EXXON

Opening ceremony

The 3rd WANA International Congress commenced on Thursday, May 28th at 8:00 AM. The day was coincided with the decade of honor of the two lights of Wilayat and Imamate, Hazrat Fatima Masoumeh (PBUH) and Hazrat Ali Ibn Musa Al-Reza (PBUH). The congress was inaugurated with the speeches of the officials. At first, the President of Urmia University of Medical Sciences, Dr. Mohammad Amin Valizad, as the president of the Congress, presented a brief report of the university's major plans, it was followed by speeches by the scientific secretary of the program, Dr. Ahmad Vosough sTaghi Dizj,; the President of Academic Jihad, Dr. Seyed Hassan Muslimi Naini; The head of the representative body of the Supreme Leader in the universities of the province, Seyyed Mehdi Qureshi; Political and social deputy of the West Azerbaijan Governorate, Dr. Ebrahimi; and the head of the population and family support faction of the Islamic Council, Dr. Fatemeh Mohammad Beigi, who was among the guests of this congress.

As this congress can be a place for synergy and meeting of scientific and business activists in medical and biological sciences, as well as an opportunity for the presence of domestic and international knowledge-based companies that have entered the production of consumer equipment for infertility treatment., the opening ceremony featured the presentation of the companies and financial sponsors of the Congress, Behrad Royesh Royan, Bon Yakhteh Royan Technology, Orchid Farmed, Exxon Farmed, and Diyaco Plus Hotel. In the pre-congress exhibition, the companies were given an opportunity to present their products, which were mostly equipment and pharmaceutical products in infertility treatment.

The opening ceremony was ensued by the scientific sessions. the sessions were mainly focused on ART children; the role of surgery in improving IVF outcomes; the role of imaging in ART outcomes; the impact of environmental and lifestyle factors on ART outcomes, optimizing ART outcomes, challenges, management, and options; fertility preservation & oncofertility; and finally, ethical consideration in ART outcomes.

Presentations were all delivered in English, and the presenters included 10 prominent international speakers from Lebanon, Syria, Iraq, Turkey, and Egypt, as well as more than 30 prominent Iranian speakers and experts.

This year's WANA featured two pre-congress clinical workshops, one basic science workshop, and one scientific seminar which were all held on May 25 and 26. The two clinical workshops were titled "Hysteroscopy" under the scientific supervision of Dr. Mehri Mashaikhi (specialist in obstetrics and gynecology, infertility fellowship and assistant professor of Royan Institute) and "Endometrial examination in infertile women" under the scientific supervision of Dr. Firoozeh Ahmadi (Radiology specialist and assistant professor of Royan Institute) and were held in the form of one-day workshops at Milad Hospital in Urmia. The basic science workshop was titled "In vitro Maturation and Fertilization of Oocyte in Mice" with the scientific secretary of Dr. Azam Dalman (Ph.D. in reproductive biology and an assistant professor of Royan Institute) was held at the Faculty of Medicine of Urmia University of Medical Sciences in two days. The - scientific seminar entitled "Use of complementary medicine in infertility treatment" with the scientific secretary of Dr. Amirhossein Jamshidi (Ph.D. in pharmacognosy and associate professor of Iran University of Medical Sciences) with the participation of more than 130 participants from the scientific programs next to this congress.

Finally, more than a thousand participants participated in the 3rd WANA International Congress, including international medical students from India, Pakistan, Iraq, and Turkey.

The visit of the students, speakers, and guests from the beautiful tourist areas of Silvana (the suburbs of Urmia) and Urmia Lake was one of the tourist programs of the WANA Congress.

At the end of the second day of the congress, the closing ceremony began with the special blessings of the 8th Imam and the blessing of the Holy Shrine of Razavi to the participants. Then the executive report of the congress was presented by its executive secretaries and thanks were given to the efforts of the executive colleagues, especially the vice of Royan Institute, Dr. Ruhollah Fathi. Next, the executive clip of the congress was shown. In the end, the vice president of research and technology of Urmia University of Medical Sciences, Dr. Saber Qolizadeh, and the head of Royan Institute, Dr. Abdul Hossein Shahvardi, gave a speech and thanked all the participants, domestic and international lecturers, scientific and executive secretaries of the congress and workshops. Its scientists were thanked by presenting a certificate of appreciation.
