

Flow Cytometry Workshop

This workshop covers principals of flow cytometry including flow cytometer mechanism, antibody and fluorochrome selection, cell preparation and staining, flow cytometry analysis data with flow Jo software and troubleshooting in all steps.

In this workshop you will learn:

- Principals of antibody and fluorochrome selection
- Principals of panel design for multicolor immunophenotyping
- Sample preparation
- Data analysis and presentation
- Data interpretation

This workshop is suitable for graduates and students of all academic levels in biology, paramedical, and medical fields.
